

AT LAST, THE GREEN SOLUTION TO YOUR SCHOOL'S SIGNAGE NEEDS

Replas is an Australian-owned company which specialises in the manufacture of products that are made to create long-lasting recycled-plastic signage.

Created from recycled material diverted from Australia's domestic and commercial waste streams, Replas signs are the environmentally-friendly, economical alternative to traditional metal and timber signs.

Unlike metal or timber signs, recycled-plastic signs are virtually maintenance-free as they will not rust, crack, splinter or rot. Nor will they ever need repainting: the colour is embedded into the material as part of the manufacturing process, ensuring your important safety messages remain legible.

Replas recycled-plastic signs are available in seven practical styles and a range of sizes and colours. We offer the easy answer to all your signage needs from simple totem and display signs, which are ideal for providing directions and highlighting features of your school, to the lockable Notice Board sign, perfect for displaying information that is frequently updated.

Superior-quality, graffiti-resistant, high-impact polycarbonate graphic plaques are available to complement our custom-made signs.

Invest in your school's future today by installing recycled-plastic signage into your learning spaces. Not only will you be providing an innovative, robust and maintenance-free solution; you'll also be demonstrating your school's commitment to the environment to your community.

Replas can supply and install signage in every state. Call us on 1800 replas (1800 737 527) for an obligation-free quote or just a friendly chat about your requirements, or visit our website for more information.

Offices in all states!
