

Testimonial – Rotary Club of Rose Bay

3 May 2016

The guest speaker at last Tuesday evening's regular meeting (3rd May 2016) of the Rotary Club of Rose Bay, was Bert Meyer who was best described as a Roving Ambassador for 'Repeat Plastics Australia Pty Ltd' trading as "Replas". Over the next 30 minutes with the aid of a visual presentation, samples of product and a detailed product catalogue, Bert showed our members a wide range of products manufactured from plastic waste material, that were suitable for outdoor use. Products included outdoor furniture, bollards, decking and post and rail fencing. Bert placed great emphasis on the durability and non-colour fading properties of their products that make them a significant economical alternative to the use of timber and other materials.

Members were most impressed with Bert's articulate and interesting presentation. This was evident when at the conclusion of his presentation, members seemed keen to ask a whole range of questions which were promptly answered.

It added an extra dimension to the evening when it was learned that the Replas founder, Mark Jacobsen, is the son of Ole Jacobsen, a former popular member of our Club.
