

ASSEMBLY INSTRUCTIONS

IMPORTANT: Please read carefully before assembling.

JUNIOR SETTING 1.8m Free Standing

TABLE:

1. Place Table top face down on a flat surface.
2. Place supports inside metal frame.
NOTE: Ensure that the Table Supports have the counter sink holes facing outwards on the support base.
3. Using the 125mm bugle screws supplied, fit crossarm between the two table supports.
4. Using a 3.5mm drill bit, drill into the support through the pilot holes in the metal frame.
5. Using the 40mm Hex Screws supplied, screw support onto frame, taking care not to over tighten as this could strip the thread in the support.
6. Once all screws have been tightened, turn setting over and place into position.

BENCHES:

1. Benches are pre-assembled and ready for installation
