LAKE BOGA INSTALLATION

South of Swan Hill lies Lake Boga, Victoria – where hundreds of 100 mm and 125 mm black bollards were installed in the surrounding grass and boat ramp. The recycled plastic bollards were strategically placed along the main park area for visitor safety.

“During the construction phase of Lake Boga Foreshore Restoration, it was one of the many times we have used this product, but it has made a lasting impression as we continue introducing this product to our customers,” explained Sandra Whitfield, Financial Manager. “Easy installation with lasting quality, real Replas Pro’s!”

CHINA BAN UPDATE: LATEST NEWS

The Chinese government have recently launched the National Sword Program, banning the import of recycled materials which Australia relies on for about 30% of all recycling. “In Australia alone, about 619,000 tonnes of materials – worth \$523 million – is expected to be impacted by the Chinese ban.”

With unquestionable short-term challenges, this is an opportunity to focus on developing domestic markets and innovations here in Australia. At Replas, this is a chance to enhance the Circular Economy in Australia and use waste as a valuable resource. Committed to making the world sustainable, Replas encourages your selection and procurement of recycled plastic products, making you become the true recycler.

BRIDGING THE WAY TO A BETTER FUTURE

Replas Pro - Plants Whitsunday have installed two bridges with recycled plastic decking Enduroplank™ in Whitsunday Council, QLD. "Both the bridge projects went very well, the council was so impressed with the first one that they ordered a second bridge only a brief time after," explains Matt Stokes, Manager at Plants Whitsunday. "The design is extremely robust and perfect for the harsh environment. The client was very happy with the completed aesthetics and happy to have maintenance free materials. Once familiar with the materials, they are very good to work with and always provide a great finish."

ANOTHER PICTURE 'PERFECT' TREX® DECKING INSTALLATION

A beautiful deck doesn't have to be maintained every weekend, and should withstand the weather! Impressed home owner Cheryl says, "since having my timber deck removed, and replaced with my Trex® Deck I have been flooded with compliments. The fact that it is maintenance free, and always looks immaculate is what I love most." Highly recommending the builders at JP Carpentry, Cheryl's final word? "Perfect!!!"
