

### Increase the visibility of your wheel stop

Heavy-duty, high-visibility reflectors are an optional extra for your wheel stops. Reflectors are inserted into routs on both sides of the wheel stop so that they sit flush with the surface. This not only maximises visibility, but also improves safety and durability.

#### Mod # 1: 3 Round reflectors on front only

Front

Back

#### Mod # 2: 3 Round reflectors on front, 2 Round reflectors on back

Front

The reflectors are very high intensity grade reflective sheeting, a high-quality, durable micro-prismatic retroreflective material. Its unique prismatic construction provides an extra high level of reflectivity for demanding traffic control situations.

Exceeds applicable requirements for very high intensity grade sheeting applications for Types III and IV retroreflective sheeting as set forth in ASTM D 4956.

#### Reflector Sizes:

#### Wheelstop Colours available:

Black Blue Grey Yellow

#### Reflector Colours available:

Yellow White \*Red

*\*Red only available for round reflectors*
