

Speed Humps

Recycled-plastic speed humps are flexible enough to allow them to conform to slight irregularities in the pavement surface, yet are strong enough to withstand reasonable loads. With a weight of 16 kg, Replas speed humps are light enough to be installed by one person without the use of lifting equipment.

They are available in yellow and grey and can be simply and securely fastened to a driveway surface. Fasteners are available for an extra cost; bolts are used for concrete with spikes used for bitumen.

Speed hump specifications

- Height: 60 mm
- Length: 1.5 m
- Spike diameter: 12 mm
- Width: 380 mm
- Weight: 16 kg
- Bolt diameter: 10 mm

Note- Replas speed humps are designed for use in off-street parking areas. The product is not suitable to be driven over frequently by trucks. The product warranty will be void if evidence suggests frequent truck use.
