

# Tree Guard Kit

## Specifications

This sturdy recycled-plastic barrier is designed to safeguard your trees. By connecting these panels to our 100 mm square bollards we can create a stylish and economical solution for the protection of your trees.

Horizontal tree guard

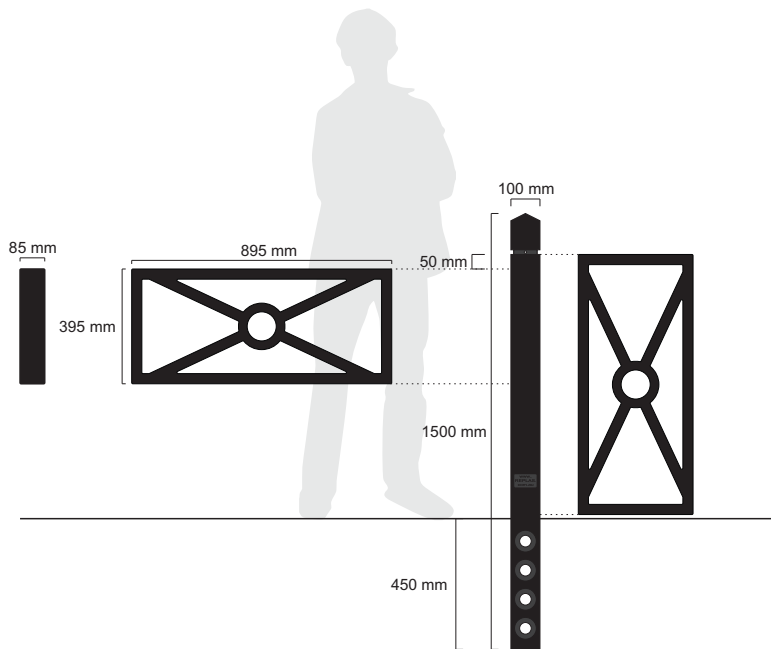

Vertical tree guard

Tree guard panel

The kit includes four 100 mm square bollards, four tree guard panels and sixteen 75 mm bugle fasteners. Bollards and tree guard panels are also available individually.

The tree guard kit can be assembled in two ways, horizontally and vertically. It does not come pre drilled due to different installation options and is to be pre drilled and assembled on site.

Standard

Colours available: Black Green

Bollard Wall thickness: 20 mm

Installation depth: 450-600 mm

*Measurements are subject to a 2-3 mm variance due to expansion and contraction of Replas Recycled Plastic*
