

Off-cuts, damaged goods, and alike can be sent back to us for recycling and remoulding to create new sustainable products to be re-distributed into the community. Products that reach the end of their life cycle are also encouraged to be sent back to us to then start the cycle again. This is also available for remote customers.

When sending products back to Replas, they **must** follow the below guidelines:

1. Clean, free of mud, concrete, and contaminants (paint is accepted).
2. Metal free, including all fasteners, screws, rivets etc.
3. Signage, plaques, reflectors, tape, and all adhesives to be removed.
4. Scraps must be packed securely on a suitable pallet or skid to allow a systematic and quick loading and unloading of vehicles.
5. No pieces larger than 300mm in length.
6. Freight to return offcuts is at the expense of the customer. Drop off is available at the Replas Resource Centre (RRC) within agreed time frame at the below address:

36 Aster Avenue  
Carrum Downs, VIC 3201

**If the returned goods do not comply with the above, they will not be accepted.**
